## Health Expenditure across States — Part II Regional Disparity in Expenditure

Ravi Duggal Sunil Nandraj Asha Vadair

HEALTH is a state subject and the primary responsibility of providing health care is with state governments. States' expenditure accounts for around 90 per cent of all public expenditure on the health sector. Central funds for the states are in the form of grants to particular programmes, e.g. family planning or as sponsored schemes. Funding for sponsored schemes is mainly for the national programmes for diseases control. State-level variations on expenditures on health over the years show that as a proportion to total government expenditure it shows a declining trend in most states especially after 1985-86.

Usually the better developed states like Goa, Haryana. Karnataka, Maharashtra, Gujarat, Punjab have a higher per capita expenditure as compared to states of Bihar, Rajasthan, Orissa and Madhya Pradesh. Kerala, in spite of it being at a lower level of the socio-economic development scale has a higher spending on health. The very high per capita expenditure among 'other states' is because many of them are in hilly regions, having a sparse population distribution and a very high central assistance for development activities. The high per capita expenditure should not be interpreted as better health status since if viewed as percentage to total government expenditure it is no different from other states in the country.

The expenditure incurred on disease control is mainly on the various national programmes for communicable and noncommunicable diseases. Overall, the expenditures on disease programmes as percentage of health expenditure across various states shows a declining trend (Table 9). It has been considerable in the states of Assam, Karnataka. Madhya Pradesh. Punjab. Rajasthan and Tamil Nadu. Rajasthan. West Bengal. Assam. Bihar. Karnataka. Madhya Pradesh and Orissa on an average spend less than Rs 7 per capita per annum on

disease programmes. Low priority and under-funding for disease programmes persist in spite of an increase in morbidity and mortality due to malaria, tuberculosis, blindness, diahorrea. immunisable diseases. AIDS. etc.

Expenditure on hospitals and dispensaries mainly consists of curative care. Nearly one-fourth of expenditure by most of the states is on this head (Table 10). On an average Goa, Kerala, Tamil Nadu spend around 40 to 50 per cent on hospitals and dispensaries. Expenditure across states shows a declining trend especially after the 1980s. The declining trend and under-funding by most of the states has been a major reason for the non-functioning of public hospitals. During the same period in most states, there has been a mushrooming of private hospitals and nursing homes, which are largely unregulated.

On an average health administration constitutes around 9 percent of the total health expenditure (Table 11). The major expenditure is on the production of doctors and nurses, with the former being given more importance. Compared to other stales, expenditure in Tamil Nadu. West Bengal. Karnataka. Kerala. Maharashtra and Uttar Pradesh along with union government has been high (Table 1). one of the main reasons being the existence of a large number of medical colleges in these states. The expenditure on the production of doctors does not reflect their availability. These doctors and nurses are trained at public cost. For every three doctors the government trains for its health services, seven are trained for the private sector at public cost and many of them also migrate abroad.

Another head of expenditure that has increased in terms of actuals and as a proportion of health expenditure is the family welfare programme (Table 12 and 13). This is an entirely centrally funded programme. It has been the single-most impressive acti-

vity of the government. Over the years, expenditure on family welfare programmes has increased at a very fast pace. More than half the plan resources for the health sector are allocated to it. Prior to 1972 the expenditure on family welfare programmes was not shown separately as an item by the CFRA, figures here are therefore from 1975-76 onwards. In spite of the massive expenditure, the total fertility rate is around 4.5 per woman and the growth rate has remained near constant for the past three decades at around 2.2 per cent per annum.

The state health sector supports a huge humanpower. Expenditure across the states brings out that there have been many ups and downs over the years (Table 15 and 15a). This has not been due to a decline or increase on this head, but due to the shifts in accounting procedures, classification, nomenclature and definitions of the subheads. As a consequence, administrative costs are either under programme cost or are excluded from it. Variation also exists between various states in accounting heads. In somestates, expenditure of the directorate is not included in the health programme, therefore the expenditure is lower. In Maharashtra, the directorate expenditure is included under health administration, therefore the expenditure is higher (Table 15 and 15a). The major shift of account heads took place during 1974-75. It resulted in decline of expenditure due to classification of heads under various subheads. Andhra Pradesh. Gujarat Karnataka. Uttar Pradesh, West Bengal have shown a declining trend over the years and for. Haryana the decline has been very sharp. If we examine data between the years 1950-51 to 1970-71 Assam. Karnataka. Maharashtra. Madhya Pradesh. Orissa. Rajasthan. Punjab. Uttar Pradesh and West Bengal show an increase on this head as a proportion. The others show volatile shifts in expenditures.

#### VIBHOOTI SHUKLA MEMORIAL

## National Seminar on Environmental Economics and Urban Policy

#### Call for Papers

The Indira Gandhi Institute of Development Research, Bombay will be organising a two day National Seminar on 'Environmental Economics and Urban Policy' during October, 1995 as part of an annual seminar series which would focus attention on various issues of urbanisation.

This year the focus is on urban environmental issues like air and water pollution. The seminar will be attended by academic researchers and policy makers from various government and local self government bodies to ensure that the recommendations of the seminar are translated into meaningful policy at the earliest. The institute will also bring out a series of monographs on urban development issues based on the papers and proceedings of this seminar series.

Those who wish to contribute papers on urban environmental issues may send an abstract by 1st of August, 1995. Acceptance letters, format for full papers and exact details of the conference shall be mailed to the authors by 1st of September, 1995. The full papers are due by 1st of October, 1995. In case of acceptance, IGIDR will provide local hospitality to the authors. Limited travel support is also available.

The Indira Gandhi Institute of Development Research is an institute of advanced research, established by the Reserve Bank of India, engaged in policy analyses in the areas of Environment, Energy, Agriculture, Industry and other developmental issues. Vibhooti Shukla was a visiting researcher at IGIDR and worked on urban environmental issues. She died in a freak accident while at University of Texas at Dallas. This series of seminars is being instituted at IGIDR in her memory.

Send your abstract to
